Introduction

The IDEA 2004 Reauthorization and the IEP Process

Of the many acronyms used in special education, the most well-known is "IEP." Educators and parents as well as many people in the general public know that if a student has an IEP, he/she is receiving special education and related services.

Guidelines: Individualized Education Program Planning Process were developed by the North Dakota Department of Public Instruction to assist educators who are developing IEPs for students with disabilities. Changes in the Individuals with Disabilities Education Act (IDEA) resulting from the 2004 reauthorization of the federal special education law, and the publication of accompanying final regulations in 2006 by the U.S. Department of Education, prompted the revision of this document.

As defined in federal regulation 300.22 an individualized education program or IEP means "a written statement for a child with a disability that is developed, reviewed, and revised in accordance with 300.20 through 300.24." It sounds so simple. Yet the IEP process is the focus of intense work by millions of educators, students and parents across America. Frequent criticism of the IEP process is that it is unnecessarily detailed. However, because of the unique needs of each child with a disability, there is a need to thoroughly consider the special—individualized—needs of that child. The IEP is the process for a thorough discussion of those needs and a documentation of the plan for that child to receive a free and appropriate public education.

Guidelines: The Individualized Education Program Process incorporates major themes of the 2004 reauthorization of the IDEA. In this document you will see an increased emphasis on:

- Early intervention;
- Access to the general education curriculum;
- Scientifically based instruction;
- Paperwork reduction;
- Streamlining of the IEP process; and
- Caution related to disproportionality.

Throughout this document, quotes from the IDEA 2004 law, regulations and other supportive documents are included and in some cases, the description of the intent of Congress in making changes to the law. A significant effort has been made at the federal level to make the law and regulations more understandable to parents and school personnel.

Another feature of the IDEA 2004 and the final regulations is an increased relationship between special education and the Elementary and Secondary Education Act (ESEA). The Elementary and Secondary Education Act now reauthorized as the Every Student Succeeds Act (ESSA). Perhaps nowhere is this more evident than in the high-leveled accountability that is expected. The North Dakota State Performance Plan for Special Education (SPP) is our six-year plan for improving the educational results for all children with disabilities. There are 17 indicators and each indicator detailed in the State Performance Plan contains information such as baseline data, measurable and rigorous annual targets, and improvement activities.

Services

Service. Enter the specific service that will be provided. This may include special education instructional services (directly provided to the student, or indirectly provided to the student via consultation or training to other personnel), or related services.

Related services means transportation and such developmental, corrective, and other supportive services as are required to assist a child with a disability to benefit from special education. It includes speech-language pathology and audiology services, interpreting services, psychological services, physical and occupational therapy, recreation, including therapeutic recreation, early identification and assessment of disabilities in children, counseling services, including rehabilitation counseling, orientation and mobility services, medical services for diagnostic or evaluation purposes, school health and school nurse services, social work services in schools, and parent counseling and training.

Minutes. State the actual minutes and frequency (i.e. daily, weekly, monthly) of all indirect as well as direct services that will be provided. For example, if a special education teacher works directly with a student for ten hours per week and consults with the classroom teachers one hour each week, the amount of service shown on the IEP is ten hours of direct SLD services and one hour of consultation per week.

When services are provided on less than a weekly basis, they must be reported in a manner that clearly conveys the intent of the schedule. For example, if services are to be provided for 60 minutes every other week, this should be clearly stated on the IEP; *do not* calculate a weekly average of 30 minutes per week in this case. To further clarify services in this example, "every other week" is preferable to "the first and third Monday of the month", since some months have more than four Mondays.

Starting Date. Enter the specific date (month, day *and* year) on which the service will begin. It is possible that some services may be initiated after others.

Duration. Enter the amount of time needed for the identified service.

Service Provider. Identify the job title for each separate service, e.g., speech-language pathologist, SLD Teacher.

Location of Services. Identify the building name and room (as a room number or environment, such as general education classroom, lunchroom, gymnasium, vocational center, etc.)

Length of School Day. When it is determined by the team that a student's needs dictate a school day that deviates from the normal school day for peers who are not disabled, an explanation or justification is required. On the IEP form, check the sentence that best describes the length of the student's school day. If the team determines that the student will attend for a shorter or longer school day than his/her peers, it must explain why this is necessary.

Extended School Year. An annual IEP applies to the *normal school year* (as defined by individual school district calendars) and typically does not include breaks and summer vacation. If individual needs of the student require programming during school holidays, for an entire twelve-month period, or an extended school year, the IEP must state specifically those additional time periods.

Check the sentence in this section of the IEP form that reflects the team's decision about extended school year services. If the team determines that additional data must be collected before a decision is made, a date for the next team meeting must be recorded on the form. The team's justification for its decision regarding ESY must be documented.

ESY must be considered for *every* student for whom an IEP is written, regardless of the disability.
